CORPORATE PROFILE

THE COMPANY

Qatar Project Group International LLC is a part of Dolphin Holding under the chairmanship of Sayeed al Misnad. QPGI started its operations in 2004 and has successfully deployed many large projects for major enterprises in Oil & Gas, Government, Airport, Seaport, Shipping, Banking, Hospitality, Telecom & Airline sector.

QPGI is offering a complete gamut of Technology based Information Systems Integrator Services in the region. QPGI has the vision, resources, skill sets, investments and able leadership to transform into a large systems integrator and service provider.

With the expertise of its principal partners QPGI provides integrated assessment services against set of best practices from all applicable frameworks in healthcare and IT with all the three perspectives – People, Process and Technology enabling Process Architecture, Application Architecture, Data Architecture and Infrastructure Architecture roadmaps. Driving organization design that provide direction for leveraging people, processes and technology to meet the challenges of today's pragmatic business challenges.

We are a dynamic, innovative service provider with a commitment to supporting our customers in every aspect of their IT infrastructure – both today and in the future. With over 7 years of industry experience, you can be sure that our guidance is sound, and that our capability to deliver technology solution is efficient and reliable.

OUR VISION

To be a key system integrator in the region in the identified segments.

CORE STRATEGIES

Our business model is based on following key strategic attributes which are not only a scalable one but will help us achieve defined goals.

Developing Expertise's in the Niche Domains

MOBILITY

SECURITY

INFRASTRUCTURE

CONSULTING

Focus on Key Verticals

GOVERNMENT

TELECOM

HEALTHCARE

**BANKING
&
FINANCE**

HOSPITALITY

OIL & GAS

OUR EXPERTISE

Mobility Solutions

- Enterprise Wi Fi, WiMAX & Wi Mesh Solutions
- Smart SMS Solution, WAP & Data Services.
- RF/ WAN Management, Automatic Calibration, Security (LEA), end to end Encryption, HIPPA Compliance.
- Services on Wireless
- Billing Solution for Voice / Data.
- Applications Development,
- Asset, People and Location tracking.
- VSAT Solutions (Inland and sea)
- Any type of Wireless / Radio connectivity solution (Point to Point / Multipoint)

Security Solutions

- Probe, monitor and block Wireless / Wired Network Traffic.
- LEA solutions.
- Network Forensic Solution.
- Packet Forensic DPI.

Infrastructure Solutions

- Intrusion Prevention / Detection Solutions.
- Managed Services for Anti Virus / Anti spam.
- RFID, Access Control with Integrated CCTV monitoring people / assets.
- Smart Card Solution & Integration with customized applications.
- High end Routing and Switching Solutions for Enterprise Backbones.
- High end Storage Solutions.
- Disaster Recovery Management
- Structured / Optical Cabling.
- Software Solutions (Bilingual)

Consulting & Services

- Process Consulting (ISO9000).
- Skilled manpower services (FMS).
- IT Management Consultation.
- Infrastructure Consulting.
- Existing Systems Consolidation and Optimization.
- Project Management Consulting.
- Applications development and deployment.
- Pre RFP Design consultation.
- RFP Evaluation process management.
- Project Management for Multi vendor implementation.
- Managed Implementation and Documentation.

PRODUCTS AND SOLUTIONS

This is a product which is going to innovate the way people look at storage management, a company started by industry veterans and founders of companies like IBM XIV, HP, Apple, EMC who got together and redefined the way storage, availability and backup is currently looked at. This will change the way backups currently happen and has the potential to save up to 80% of storage spending within 6 months.

Tenable is rated by Gartner, INC and SC magazine as one of top 5 Vulnerability assessment solutions, they have an enterprise solution which detects in real times vulnerabilities and the threats associated with it and help you take corrective actions.

INTRUSION PREVENTION SYSTEMS (IPS) AND THREAT MANAGEMENT SYSTEM (TMS)

A complete set of security solutions that address today's sophisticated security threats at the perimeter and interior of your business.

NETWORK EXTRUSION PREVENTION AND FORENSICS

Fidelis is a Gartner leader in network extrusion prevention system and network forensics and used by leading companies like Department of Defence, FBI, Citibank among others. What it does is and there is nobody else in its category that it audits all data going in and out of the network and help identify for data leakage outside the organization, detects zero day attack in its track and gives you holistic network forensics.

PROXY SG - The industry-leading secure web gateway.

Get world-class threat protection backed by Blue Coat's real-time WebPulse technology and more than 75 million users. ProxySG provides complete control over all your web traffic with robust features that include user authentication, web filtering, data loss prevention, inspection and validation of SSL-encrypted traffic, content caching, bandwidth management, stream-splitting and more.

FIREWALL SERIES

Specifically designed to deliver high-performance firewall/VPN security to large enterprise, carrier, and data centre networks. Built around our third-generation security ASIC and distributed system architecture, these VPN firewall security systems offer excellent scalability and flexibility, while providing a higher level VPN firewall security system through the NetScreen, ScreenOS custom operating system.

NETASQ provides a cost effective, proactive "all-in-one" security solution, which allows you to gain full control of network threats, including open back-doors, viruses, unsolicited mails and visits to inappropriate websites. Optimized network performance and reduced total operational costs of your IT security infrastructure are achieved without the requirement to add any additional components.

PRODUCTS AND SOLUTIONS

Network DDoS Attack Prevention

Corero's DDoS Defense System (DDS) is your organization's First Line of Defense against crippling, costly Distributed Denial-of-Service (DDoS) attacks, delivering the most comprehensive DDoS protection available. Purpose-built, on-premises DDS detects and blocks both familiar network-layer flooding attacks, and the newer, difficult to detect, low and slow application-layer attacks, which have become the attackers' weapon of choice.

Traditional cloud-based anti-DDoS services are largely ineffective against these application-layer attacks. Corero's DDS uses an adaptive, patented DDoS defense algorithm to ensure your online business is always up, always available — blocking malicious incoming requests while passing legitimate traffic to the company's protected servers.

SIEM 2.0, Log & Event Management, Log Analysis

LogRhythm is the leader in cyber threat defense, detection and response. The company's SIEM 2.0 security intelligence platform delivers the visibility, insight and response capabilities required to detect the previously undetectable and address the mutating cyber threat landscape. LogRhythm also provides unparalleled compliance automation and assurance as well as operational intelligence to Global 2000 organizations, government agencies and mid-sized businesses worldwide.

PLUG AND PLAY NETWORK MONITORING

Industry's first integrated solution to combine network tapping capabilities with network and application monitoring. This new approach fulfils a need that until now had gone unmet—the challenge of affordably monitoring remote sites with data throughput up to 100Mbps. Now, without investing in costly on-site engineers, you can capture and analyse network traffic and application activity, plus monitor VoIP calls. You can also carry out capacity planning and trend analysis to improve business continuity.

For over a decade, Fluke Networks has provided innovative solutions used by enterprises and telecommunications carriers that give network installers, owners and maintainers superior vision: combining speed, accuracy and ease of use to optimize network performance. Some of our most recognized products include DTX CableAnalyzer for media testing, OptiView Network Analyzer for monitoring and analysis, AirMagnet for wireless network assurance, and Network Time Machine for forensic analysis.

MARKET LEADER IN ENTERPRISE FAX OVER IP SOLUTIONS

- Save money by reducing paper, phone lines, modems, stand-alone fax machines and related supplies.
- Increase productivity by allowing users to fax directly from business applications and workstations.
- Shorten the business cycle by speeding document delivery and integrating with your business workflow.
- Help with compliance by providing a secure place for managing all document delivery.

PRODUCTS AND SOLUTIONS

WIRELESS LAN (WLAN) SOLUTION

Aruba Networks is a leading provider of next-generation network access solutions for the mobile enterprise. The company's Mobile Virtual Enterprise (MOVE) architecture unifies wired and wireless network infrastructures into one seamless access solution for corporate headquarters, mobile business professionals, remote workers and guests. This unified approach to access networks dramatically improves productivity and lowers capital and operational costs. Currently Aruba is being used in most of the large organizations in Qatar.

Aruba WLANs are amazingly versatile. Giving you the freedom to make best network design decision, Aruba WLANs can be deployed with or without Mobility Controllers.

Bring on your mobile devices. Aruba WLANs are BYOD-ready and use contextual data – user identity, device type, applications and location – to enforce security and QoS policies.

And world's most powerful RF technology enables Aruba WLANs to deliver predictable Wi-Fi experience to high-density of mobile devices. Personal mobile apps no longer adversely impact the performance of mobile apps most critical for your business.

ENTERPRISE INFORMATION SECURITY

SafeNet data encryption and control solutions focus on data, providing persistent protection of sensitive data throughout its lifecycle, wherever it resides. Information is protected at every moment—when it is created by an employee on a company laptop, shared with a business partner by e-mail, stored in an enterprise database, processed by an application, and accessed by a field employee on a mobile device. Security extends from the data center and cloud computing environment to desktops, laptops, mobile devices, and removable media. Even if devices are lost, stolen, or misappropriated, data remains protected from all unauthorized users.

MULTI FACTOR AUTHENTICATION

SafeNet's extensive authentication portfolio includes comprehensive management system options which allow organizations to achieve maximum scalability while customizing the authentication profile, controlling security levels based on usability needs and security policies, and centrally managing a range of different authentication devices for diverse groups of users.

Avaya is a leading global provider of next-generation business collaboration and communications solutions, providing unified communications, real-time video collaboration, contact center, networking and related services to companies of all sizes around the world.

Unified Communications Solutions

- Communication and Messaging – IP Telephony,
- Video and Conferencing
- Phones
- Platform and Infrastructure

Contact Centers

- Assisted Experience Management
- Automated Experience Management
- Performance Management

PRODUCTS AND SOLUTIONS

DNS, DHCP Core Services

Trinzic DDI

Trinzic DDI is an appliance-based network services software suite delivering state-of-the-art DNS, DHCP and IP address management (DDI), with seamless and agentless integration to Microsoft servers.

NetMRI™

NetMRI automates network change, manages device configurations and enforces configuration compliance. NetMRI ensures business uptime by giving you control of network change, configurations, compliance, policy, health and network stability.

Infoblox Grid™

The patented Infoblox Grid sits at the heart of the most advanced, highly available, fault-tolerant and massively scalable network solutions in the world. When paired with the Multi-Grid Management architecture, Grid-based networks can support thousands of hosts, centralized management of IPv4 and IPv6 networks, single sign-on and other advanced capabilities.

IP ADDRESS MANAGEMENT (IPAM)

Infoblox IPAM automates and simplifies IP address management for a more resilient, more available network. IPAM automation yields up significant savings in IP management and monitoring related activities. Tasks that took hours or days to complete can now be accomplished in minutes, freeing IT staff to focus on strategic initiatives like virtualization and cloud and mobile computing.

NETWORK AUTOMATION

Infoblox has created the next generation of network automation solutions. We solve the problems of the past by:

- Delivering a more powerful and flexible automation platform. Where scripts are needed, they can be more abstract and flexible, making automation tasks simpler to customize—with less manual interaction—and easier to maintain.
- Packaging GUI-driven tasks with user permission controls. Common tasks are simpler to execute, so senior network engineers can safely delegate these tasks to less senior staff members, and still retain oversight.
- Integrating automated network solutions with DHCP, DNS, and IPAM. Infoblox delivers a more complete network provisioning solution out of the box.

HSIA, 3G Offload, IP Management/IPv6

ANTlabs is one of the leading network solutions providers for visitor-based solutions and the growing enterprise security market which includes end-point security, threat mitigation and network quarantine.

In the Telco/ISP Infrastructure industry, ANTLabs' Service Selection Gateways and Value-Added IP Service Management Platforms have enabled Telcos and ISPs to enter the competitive market with great speed and confidence.

Within the Hospitality space, ANTLabs' Hospitality solutions are a key business enabler for service institutions such as hotels and airports deploying High Speed Internet Access (HSIA) services for its guests.

PRODUCTS AND SOLUTIONS

PACKET SHAPER

PacketShaper gives you content-aware control of today's web-integrated WAN. Assure quality for VoIP and videoconferencing. Contain recreational traffic to any level you specify. PacketShaper's unique integration of application and web content intelligence gives you the x-ray vision needed to monitor today's network traffic, and enforces your rules with priority, partition and rate control technologies. PacketShaper analyzes and positively identifies traffic generated by hundreds of business and recreational applications.

NEWGEN
One world. One workplace.

BUSINESS PROCESS MANAGEMENT, ENTERPRISE CONTENT MANAGEMENT, DOCUMENT MANAGEMENT SYSTEM

Newgen is among the fastest Business Process Management (BPM), Enterprise Content Management (ECM) and Customer Communication Management (CCM) implementers. We are committed to ensuring cost-effectiveness and quicker ROI for businesses. Our solutions also provide customers the agility to innovate faster. Moreover, at Newgen, we understand that all our customers are unique and so are their needs, which is why we believe in last-mile integration.

OUR ESTEEMED CUSTOMERS
